

Important News – Strengthening Endo for Tomorrow

To Our Valued Health Care Providers,

Our top priority has always been – and remains – to support you and your patients by providing life-enhancing products and excellent service. Given that you entrust Endo with your patients’ critical needs and wellbeing, we are reaching out to share a significant development that will enable us to advance our mission of helping everyone we serve live their best lives from a strengthened financial position.

On August 16, we initiated an in-court financial restructuring process after reaching an agreement with our senior debtholders on a transaction that would significantly reduce our debt and address opioid-related and other claims without the need for continued costly, time-consuming litigation.

We already have a portfolio of high-value branded pharmaceutical products and quality, cost-saving generics as well as a demonstrated ability to bring innovative medications and new treatments to market. At the end of this process, we will be even better positioned for the future.

In the meantime, our momentum has not changed. Importantly:

- **Your patients can expect to receive the same access to the highest quality products – without interruption.**
- **We intend to continue all of our patient-related policies and programs – without interruption.**
- **We will continue to invest in the expansion and enhancement of our portfolio and execute on product development initiatives, including clinical trials.**

Please feel free to visit endotomorrow.com, where you can find a Fact Sheet and relevant FAQs that provide an overview of our financial restructuring and what it means for you. If you have any questions, please don’t hesitate to reach out to your usual point of contact on our team.

Thank you again for your support and loyalty. We are grateful for your ongoing trust in our products as we work to strengthen Endo for tomorrow.

Your Endo Team
